

a family affair

fun-driving **CASE** compacts

Our family affair began when Dad spotted the Case name on the garden tractor hood! In a rush of boyhood memories Dad seemed to see his father on the family farm driving one of those big Case farm tractors. But now Dad was looking at that same big tractor reliability in a compact size.

125 years of tractor-building experience designed into two great new Case Garden Tractors. A sleek Model 155 and a husky Model 195. Ten and twelve horses, respectively - ready to gallop at a key's turn. Both Case compacts with revolutionary Hydra-Static Drive for instant speed control. No

clutching. No shifting in either Case! Grille-to-hitch quality so carefully tested . . . durability so unquestioned . . . Dad can take home a 12-month, no-hour-limit warranty. On the following pages, you'll see the Case Compact on a variety of jobs in every season of the year.

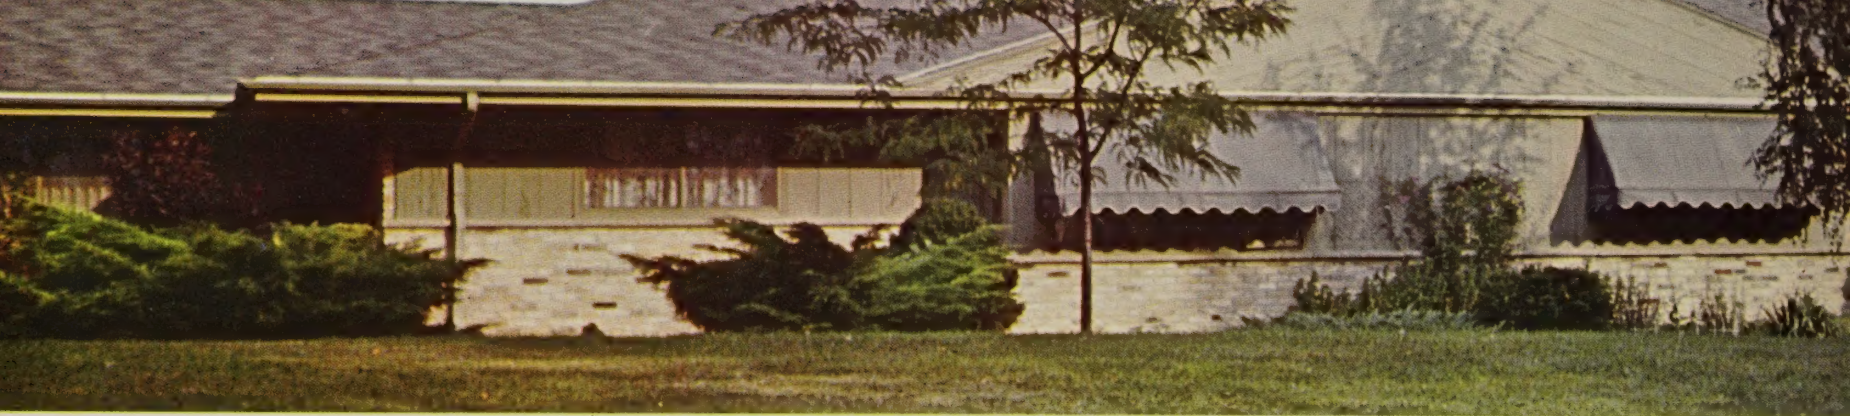

Hydra-Static Drive—automatic transmission!

No clutch. No shift. Case Hydra-Static Drive is powered *directly* by the air-cooled engine. No chains or belts. A single lever on the instrument console lets you control an infinite selection of tractor speeds—forward and reverse. You can change your travel speed, on-the-go, while full engine power is delivered to attachments. You can decrease your travel speed over rough ground or for tight maneuvering, while your mower, snow blower or other attachments continue to operate at full speed. Easier to drive and operate.

HYDRA-STATIC CONTROL LEVER—infinite speed selection in forward and reverse. Lever is console mounted for convenience with neutral position at the center. It couldn't be easier! Move the lever forward to go ahead; move the lever backward to reverse. The farther you move the lever, the faster you go.

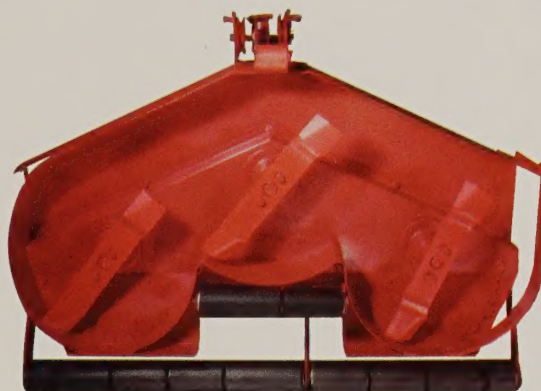

The day the new Case arrived Dad said it was his ticket to easy living. And how right he was. He lost no time in proving his point by mowing more than an acre in less than an hour. A velvet smooth job, even over rough ground. Hydra-Static Drive kept full power pouring to the rotary mower so the cutting job was always crisp and clean. This was the start of a beautiful friendship giving Dad a sun-filled span of happy, work-free weekends and a lawn that was the envy of the neighborhood.

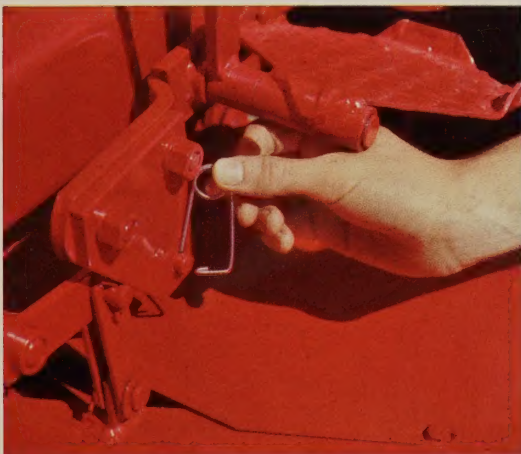

Anti-skip, anti-scalp rotary mower This is the business side of the new Case mower. Notice how the blades overlap to prevent skips or strips of uncut grass. A full width roller across the rear with a forward auxiliary roller floats the mower over ridges so it won't scalp. Cyclonic suction design lifts grass blades upright. The cut is clean and even without chopping. Case center-mount rotary mowers are available in 38 and 44 inch sizes. Meet all ASA (American Standards Association) safety standards.

Easy hookup frees tractor quickly

The mower slides under the tractor, hitch pins are inserted easily and the drive belt is adjusted. That's all there is to it.

Positive-drive attachment clutch

Turns attachments on or off. Positive engagement and disengagement – no belts. A standard convenience and safety feature.

Select the cutting height you desire

right from the tractor seat. The attachment lift handle raises or lowers the mower. Cutting height may be preset in a jiffy at any height from 1½ to 3½ inches. No matter how often you raise or lower the mower, it will return to the preset height until you change it.

The mower is also free to float upwards to follow changing ground conditions and the parallel-link suspension maintains an even cut at all times.

Keep hand trimming to a minimum. New mower design lets you mow right over the edge of walks, driveways and flower borders. Free floating action and full-width roller prevents scalping and blade damage.

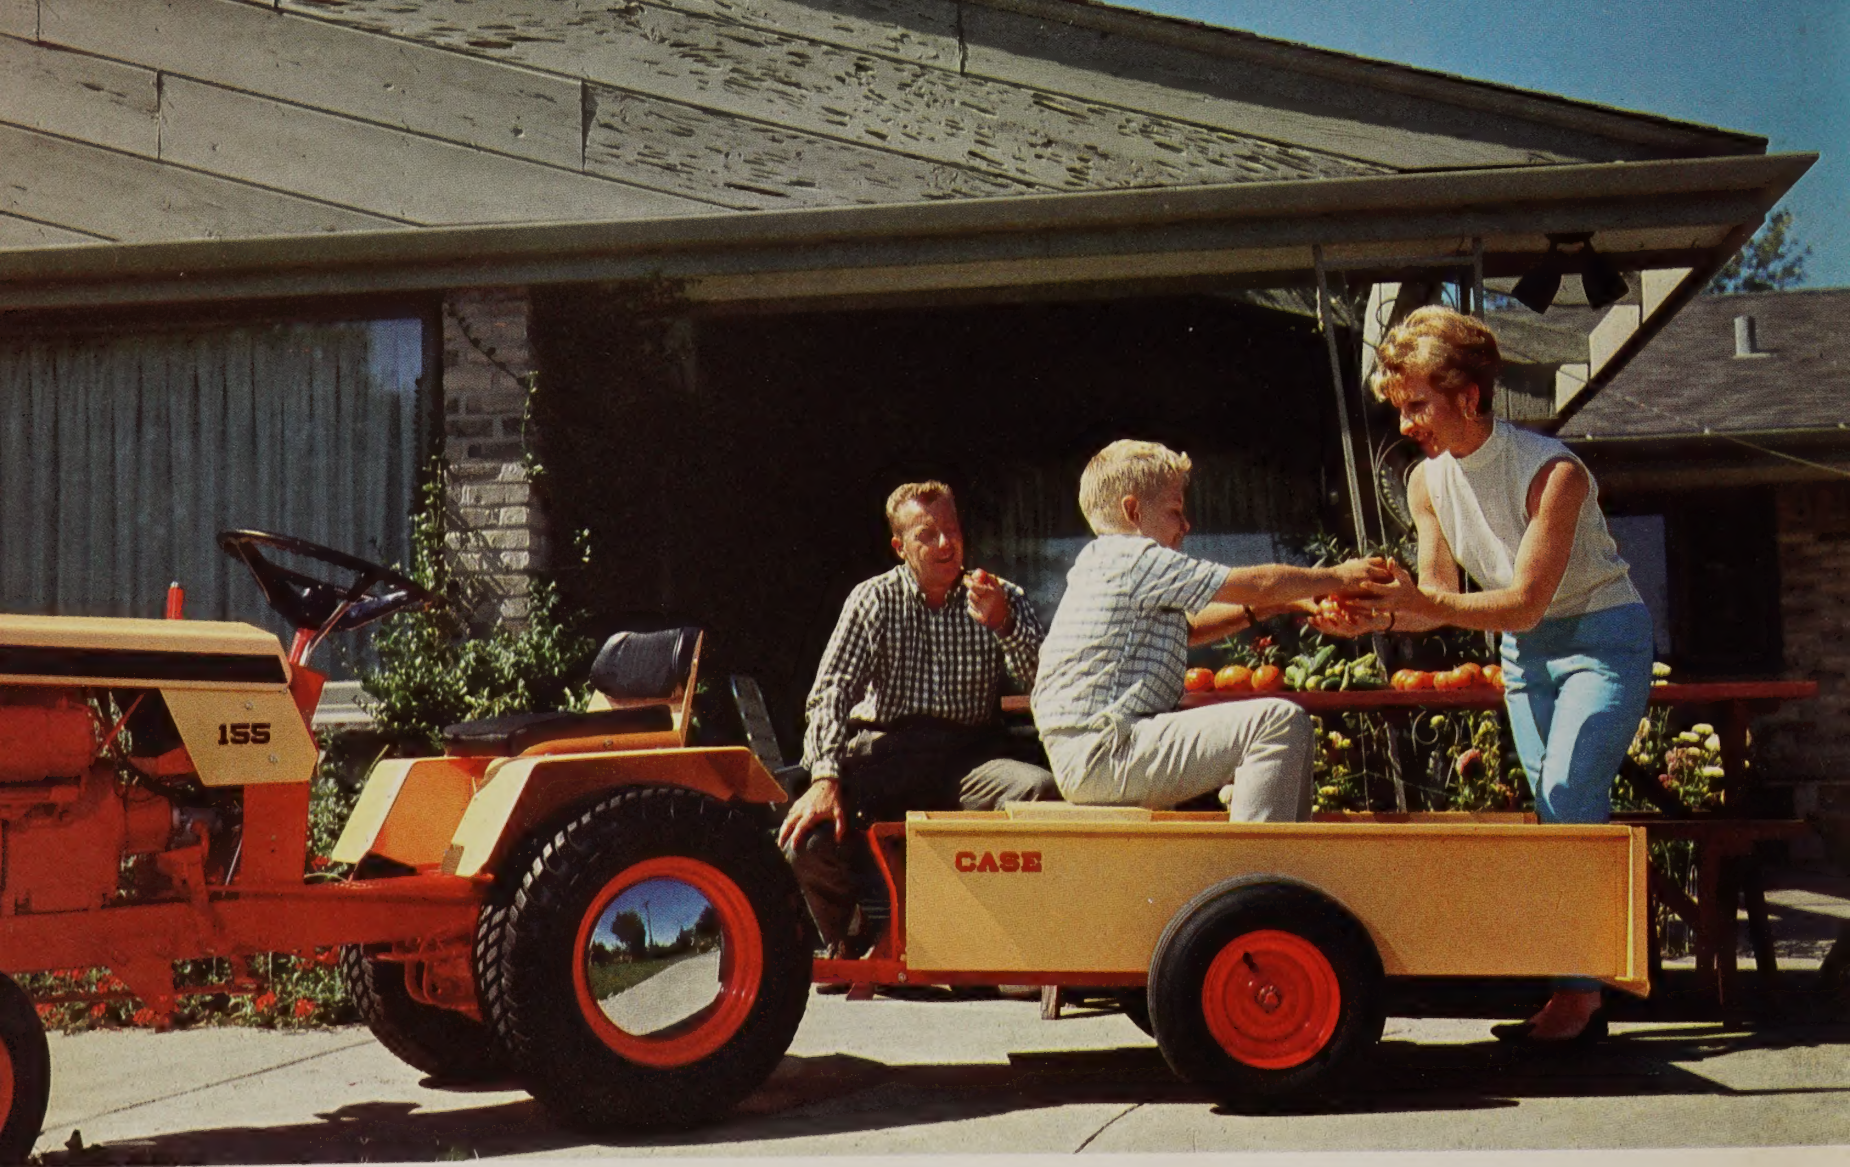

Automotive-type steering. Fingertip control. Instantly responsive handling makes the 155 as easy to steer as a sportscar. Won't backlash. Tight turn and new mower design lets you mow around objects within an inch.

Hydra-Static Drive gives you precise control . . . slow down to ease along the edge of that flower bed and dodge around those evergreens . . . then speed up again when you're in the clear. Fingertip speed control with no hesitation, no clutching, no shifting . . . an infinite selection of speeds from 0 to 7 mph.

Power to match the toughest conditions any lawn has to offer. Whether it's running fast and frisky in the clear, or barreling up steep grades . . . the 10 horses of the 155 with Hydra-Static Drive give you the authority to master the job.

Versatility from one season's end to the next.
The usefulness of your 155 doesn't end when the grass calls it quits for the summer. Your Case compact is ready to work for you almost every

day of the year, doing 1001 different jobs. A good example is the convenient utility-dump cart that Mom, Dad and Junior have used to bring the harvest home. You can haul anything up to half a ton: sand,

blocks, garbage cans, leaves, bales, rocks, shrubs, firewood. You name it. And, as you can see, the tailgate is removable to serve as a seat for passengers. (4.00 x 8 pneumatic tires - 1000 lb. capacity)

September Song has a new lilt for Jane as she uses this high capacity lawn sweeper for fall leaf gathering. Dumps from tractor seat. Handy for collecting other debris such as grass cuttings during the summer months, too. (Available in 12, 14 and 42 bushel models - Parker Sweeper Co.)

Extra features—no extra charge! Case compact tractors are loaded with standard features that are expensive options on many competitive units. Consider the **instant-acting brakes** that have just saved the life of Lucky Pierre on the right. Or the **sealed beam headlights** revealing the Halloween spooks upper right. The **comfort foam padded seat** with backrest and **wide fenders** for protection from spatters are other standard features (far right) as well as the **king-size storage compartment** Mom is using in the picture below.

Safety-key start Lets the Driveway Commandos attack at will without moving an inch or a single battle casualty. Just hang on to the keys. Dad, you can't start it without 'em!

Snow fall to snow free in a matter of minutes!
The first snow and Sis is ready to go with the 155 and Case snow blower. She'll have that two-car driveway cleared all the way to the street in less time than it takes to find the shovel. This blower

opens a thirty-six inch path with every pass. Extension wings available to increase blower width to 44". Throw snow as much as twenty feet away. The jaunty cab with the fringe on the top shields you from wintry blasts, sleet and snow. Clear windows

provide visibility all around. Remove the sides for balmy weather and the roof makes a dandy sun shade. One more item: those headlights, a great convenience for dark, snowy evenings when you'll probably be using your snow blower most.

Easy starting in cold weather with heavy-duty, 4-cycle Kohler engine. Compression is automatically released to ease starting strain. 12-volt battery. Easy-open, front hinged hood makes servicing easy. **Here's power to handle wettest snow!** Lo-range selection (below) is *standard* equipment. No extra creeper gears or high cost attachments needed. Low range provides maximum power and extra torque to the rear wheels for those heavy snow conditions and other tough applications where big power and slow speed is required.

All controls are at your fingertips. Fast maneuvering is a cinch with no-clutch, no-shift Hydra-Static Drive – a simple flick of the lever is all it takes to change direction or speed. A convenient control rotates the spout in a jiffy through a 270° arc. The blower raises by operating the attachment lift lever to clear hidden curbs, rocks or other obstacles. Adjustable gauge wheels permit clearing gravel driveways without picking up stones.

A visit to the farm and who do you think is operating a brand new Case 12 hp compact? Grandpa! The way he looks at it, help is hard to get and the Model 195 fills the bill to a "T". This is a compact that belongs on the farm, it

handles all the tasks that are too small for a field tractor – too big to do by hand. It's fine for cleaning in tight quarters, hauling feed bags and machinery, mowing and as a mobile power source. As the family arrived for the day, Grandpa was

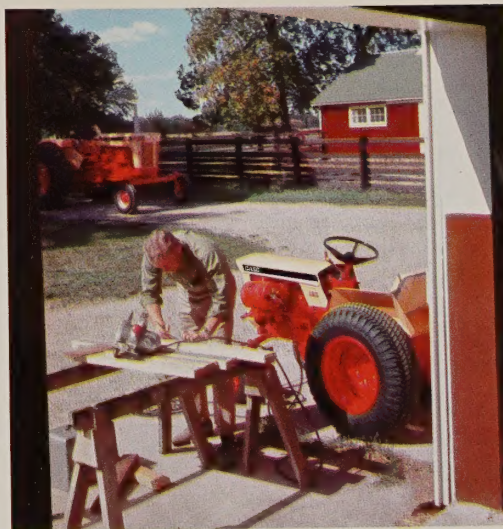

mowing the rank grass in the barnyard with his Case compact and a four-foot sicklebar mower. In the background is another member of the proud Case line – the mighty 930 – a big six-plow agricultural tractor.

Shows how 12 hp compact can do many jobs around the farm. Everybody pitched in and Grandpa showed them how his new Case could do all sorts of jobs. With a Power Takeoff kit, the 195 was put into service

powering a bale elevator. A hydraulic PTO kit is also available for use with elevators having hydraulic orbital motors. Hydraulic power is supplied from tractor's main hydraulic system to raise or lower elevator, as well as drive it.

Saw, till, scrape, spray. With 110 V, 17.5 Amp. generator (top) the 195 becomes an efficient electrical power source for saws, drills, grinders – standby power. **Hydraulic tiller** (Right above) prepares seedbeds, mulches, tills. Steel tines penetrate soil up to 9 inches deep. **Blade** (Above) dozes, grades sand, gravel, soil. Excellent for cleaning poultry houses, narrow barn alleys, cramped pens. Makes snow a push-over. 44-inch and 50-inch sizes. **Sprayer** (Right) has 3 gpm output, pressure up to 250 pounds, 30 gallon tank – just right for small orchards.

Increase the usefulness of your Case Compact
A wide choice of attachments to meet every need

A. Model 1200 Trencher. Digs trenches for water, gas, telephone, drainage and electrical lines. Trench widths and depths from 4-inch trench 5 feet deep to 12-inch trench 2½-feet deep. C. F. Mfg. Co.

B. Rotary Broom. Makes a clean sweep of walks, driveways, malls, parking areas. Broom is 4' wide. Angles 31° right. Jenkins Equipment Co.

C. Moldboard Plow. Available in 8, 10 and 12 inch sizes. Rolling coulter. Depth adjustment to 6". Brinly-Hardy Co.

D. Mounted Dump Cart. Just right for trash, leaves, dirt, fertilizer. Hauls up to 150 lbs. Spring latch release for dumping from seat. Brinly-Hardy Co.

E. Gang Reel Mowers. Preferred for big mowing jobs. 3 gang cuts swath 60" wide, 5 gang - 96". Transport frame lifts mowers for moving. Roxy-Bonner, Inc.

F. Flail Mower. Pivot mounted flail knives mow, shred, mulch. For rough, problem areas. Won't throw debris. Haban Mfg. Co.

G. & I. Soil & Gravel Rake. "G" shows the 6' model and "I" the 4' model. This heavy rake provides efficient leveling action, stone and trash removal. Grading blade. York Modern Co.

H. & K. Toolbar. Implements bolted to husky bar make grader, scarifier, harrow, disk - many others. "H" shows the toolbar with spring tines for tillage. "K" with cultivating sweeps. Available in kits. Brinly-Hardy Co.

J. Power Sprayer. Handles insecticides, herbicides, liquid fertilizers. Shown is the Matador - 30 gal. tank, up to 250 lbs. pressure. The Suburban Model is also available with 12½ gal. capacity. Hudson Mfg. Co.

L. Planter-Fertilizer. Save your back! Plant a wide variety of garden crops. Seeds, fertilizes in one operation. 4 quick-change seed plates. Brinly-Hardy Co.

M. Cultivator. Adjusts for rows from 6" to 42" wide. 7 reversible shovels. Other cultivating tools available. Brinly-Hardy Co.

N. Spiker-Aerator. Rejuvenates compacted lawns, 32" coverage. Adjustable for rough or smooth spiking. Kensico Co.

O. Disk Harrow. Basic unit for seed beds. Available with forward disk and rear disk unit. Eight 11-inch steel blades. Cutting width 29 to 39 inches. Brinly-Hardy Co.

P. Utility-Dump Cart. Heavy gauge steel box to haul most anything up to half-a-ton. Tailgate may be removed for extra long objects or as a seat for passengers. 4.00 x 8 pneumatic tires. J. I. Case Co.

Q. Sickle Bar Mower. Cuts heavy grass, rank weeds and light brush. 48-inch swath. Adjusts from 45° below horizontal to near vertical. Haban Mfg. Co.

R. Snow Blower. 36-inch blower. Extension wings increase size to 44". Spout swivels a full 270°. All operations controlled from driver's seat. J. I. Case Co.

S. Lawn Sweeper. Cleans up leaves, grass cuttings as you ride. Dumps from tractor seat. 12, 14 and 42 bushel models. Parker Sweeper Co.

T. Rotary Mower. Free-float, anti-scalp, three blade, rotary mower. 38-inch and 44-inch sizes. Cyclonic suction design cuts grass evenly. J. I. Case Co.

U. Dozer Blade. Heavy duty front-end blade for snow, grading or leveling. 50-inch blade for 195 and 44-inch blade for 155. Can be centered or angled at 15° or 30° to either side. J. I. Case Co.

V. Roller. Heavy steel drum holds up to 500 lbs. water ballast. 32-inches wide, 24-inches diameter. Kensico Co.

Other attachments shown on previous pages include the generator, hydraulic tiller and all-weather cab.

NOTE: Some implements and attachments shown here are not manufactured by the J. I. Case Company. They are, however, authorized by the company and are available through Case dealers. Performance and warranty of this equipment is the responsibility of the various manufacturers.

Model 155

Engine Kohler, 10 HP*
 Drive Hydra-Static
 Speed Range 0 to 7.4 MPH
 Length Overall 66 inches
 Wheelbase 46 inches
 Width Overall 35 inches

Height Overall 40 inches
 Ground Clearance 7 inches
 Fuel Capacity 5 U.S. Quarts
 Transmission Capacity 11 U.S. Quarts
 Tires - Front 6.50 x 8
 Rear 8.50 x 12

Model 195

Engine Kohler 12 HP*
 Drive Hydra-Static
 Speed Range 0 to 7.8 MPH
 Length Overall 70 inches
 Wheelbase 46 inches
 Width Overall 43 inches

Height Overall 44 inches
 Ground Clearance 11 inches
 Fuel Capacity 5 U.S. Quarts
 Transmission Capacity 11 U.S. Quarts
 Tires - Front 6.50 x 8
 Rear 8.00 x 16

*Horsepower is engine manufacturer's standard rating per SAEJ607 specifications.

Chrome Hub Caps
 For Model 155 only.
 Fit front and rear hubs.
 Bright, reflective -
 dress up your tractor.

Hydraulic & Mechanical Power Takeoff kits
 Run elevators, pumps, saws, mixers and hoists.
 Hydraulic Kit is usable with any hydraulic motor of matched capacity.

Tire Chains & Rear Wheel Weights

For added traction on soft ground, snow or ice.

Tires Traction tread rear tires are available for 195. Deep tread provides greater traction.

Hitches Brinly-Hardy Hitch - required for all Brinly-Hardy tools.

In commerce and industry Case compact tractors are being used in ever increasing numbers. Versatility, maneuverability and a wide range of attachments make them the ideal substitute for larger, more expensive units in many applications. See your Case dealer for suggested uses.

On-the-spot financing After you select the Case tractor to fit your needs, your dealer will be glad to tailor a purchase plan to to your liking. There's no red tape. No outside middleman.

12-month, no-hour-limit warranty Case compact tractors, just like the Case agricultural and construction tractors, are subject to rigid quality controls at every step of production. Each compact tractor is given dynamometer and tachometer tests. Only when a tractor measures up on every count does it earn the finest warranty in the field.

The J. I. Case Company reserves the right to make improvements or changes in specifications without incurring any obligation to install them on units previously sold.
